Bachelor of Science in Nursing [B. Sc. Nursing] programme at Brainware University is four-year degree course. The rules and regulations mentioned in the curriculum has been adopted from Indian Nursing Council.

1. Philosophy

Institute believes that:

Health is a state of well-being that enables a person to lead a psychologically, socially and economically productive life. Health is a right of all the people. Individuals, families and communities have a responsibility towards maintaining their health.

Nursing contributes to the health services in a vital and significant way in the health care delivery system. It recognizes national health goals and is committed to participate in the implementation of National Health policies and programmes.

Scope of nursing practice encompasses provision of promotive, preventive, curative and rehabilitative aspects of care to people across their life span in wide variety of health care settings

Nursing is based on values of caring, and aims to help individuals to attain independence in self-care

Undergraduate nursing program is broad based education within an academic framework specifically directed to the development of critical thinking skills, competencies and standards required for practice of professional nursing and midwifery as envisaged in National Health Policy 2002.

The teachers have the responsibility to be role models and create learning environment that enables students to acquire inquiry driven, self-directed learning and foster an attitude of lifelong learning.

Under graduate nursing education program prepares its graduates to become exemplary citizen by adhering to code of ethics and professional conduct at all times in fulfilling personal, social and professional obligations so as to respond to national aspirations.

Mission : Institute of Nursing, Brainware University will cast a transformative light on society and students by promoting quality education and research facilities. It will bridge the gap between academic intellect and professional proficiencies by making the approach to education more analytical, thorough, job-oriented, skill-based and as per industry requirements. It will also enable the students to pursue higher studies through research based activities and contribute towards an all-encompassing development of the nation.

Vision : Impart quality education and not only enhance the students' theoretical knowledge base but also their technical skills.

Imbibes ethical values and a deep humanitarian concern among the students and faculty members for their all-round development.

2. Aim

The aim of the undergraduate nursing program is to:

- Prepare graduates to assume responsibilities as professional, competent nurses and midwives in providing promotive, preventive, curative, and rehabilitative services.
- Prepare nurses who can make independent decisions in nursing situations, protect the rights of and facilitate individuals and groups in pursuit of health, function in the hospital, community-nursing services and conduct

research studies in the areas of nursing practice. They are also expected to assume the role of teacher, supervisor and manager in a clinical/public health setting.

3. Objectives

On completion of the four-year B.Sc. Nursing program the graduate will be able to:

- 3.1. Apply knowledge from physical, biological and behavioral sciences, medicine including alternative systems and nursing in providing nursing care to individuals, families and communities.
- 3.2. Demonstrate understanding of life style and other factors, which affect health of individuals and groups.
- 3.3. Provide nursing care based on steps of nursing process in collaboration with the individuals and groups.
- 3.4. Demonstrate critical thinking skill in making decisions in all situations in order to provide quality care.
- 3.5. Utilize the latest trends and technology in providing health care.
- 3.6. Provide promotive, preventive and restorative health services in line with the National Health Policies and programmes.
- 3.7. Practice within the framework of code of ethics and professional conduct, and acceptable standards of practice within the legal boundaries.
- 3.8. Communicate effectively with individuals and groups, and members of the health team in order to promote effective interpersonal relationships and teamwork.
